Professional Summary

Software Engineer with **1.6 years of professional experience** in Java application development within the automotive software domain. Experienced in **Java, Spring Boot, REST APIs, SQL, JPA/Hibernate, multithreading, concurrency, and debugging**. Hands-on project experience building backend and full-stack applications using PostgreSQL, Redis, Kafka, React, **Docker, Kubernetes, CI/CD**, and automated testing, including a distributed digital wallet and payment platform.

Technical Skills

Languages: Java, Python
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, FastAPI
Databases: PostgreSQL, MySQL, MongoDB
Messaging & Caching: Apache Kafka, Redis
DevOps & Tools: Linux, Git, Docker, Kubernetes, AWS, CI/CD, GitHub Actions, Helm, Argo CD
Testing: JUnit 5, Postman, Integration Testing, Automated Testing

Professional Experience

Software Engineer May 2022 – Oct 2023
FEV India Pvt. Ltd., Pune

- Contributed to **Java application development** within the Software Defined Vehicle department.
- Developed a **Java-based Bluetooth application** supporting device connectivity and application functionality.
- Developed a media player application using Java and SQLite, with **Git-based version control and debugging.**
- Applied **multithreading, concurrency, and code optimization techniques** during application development.

Projects

PayFlow – Distributed Digital Wallet & Payment Platform GitHub

- Developed a **modular-monolith** financial platform using **Java, Spring Boot, and PostgreSQL, with account, wallet, payment, transaction, and ledger domains.**
- Implemented transactional payment workflows with validation, **idempotency, optimistic locking**, and double-entry ledger accounting.
- Building toward **event-driven** payment processing, fraud detection and **AI-powered financial capabilities.**

Git-Prasaaran | Git-Backed Markdown Documentation Publishing Engine GitHub

- Built a full-stack documentation publishing platform using **Java, Spring Boot, React, TypeScript, PostgreSQL, Redis,GitHub APIs, JWT authentication, and Redis caching.**
- Integrated an **AI-powered documentation Q&A assistant and Model Context Protocol** tools, with **Docker, GitHub Actions, CI/CD, and cloud deployment.**

Cloud-Native Thumbnail Pipeline – Cloud-Native Image Processing Platform GitHub

- Built a containerized image-processing service using **Python, FastAPI, Docker, Kubernetes, MinIO, and Knative**, supporting thumbnail generation and S3-compatible object storage.
- Implemented **CI/CD using GitHub Actions** with **monitoring and observability** through Prometheus, Grafana, OpenTelemetry, and Jaeger.
- Applied container security scanning with Trivy and Kubernetes security controls, including NetworkPolicy.

Career Break & Technical Development

Nov 2023 – Present
Career break due to personal and family circumstances, alongside continued **technical development through hands-on software projects and DevOps training in Linux, Git, Docker, Kubernetes, Jenkins, and CI/CD.**

Certification

Course in DevOps – Sunbeam CDAC, Pune Nov 2025

Education

PG Diploma in Mobile Computing – SUNBEAM CDAC, Pune Apr 2022
66.86%
BE in Computer Science – SGB Amravati University Nov 2020
70%
