Professional Summary

Java Backend Developer with 1.6 years of professional experience building Java applications in an automotive software environment. Hands-on experience with Java, Spring Boot, REST APIs, JPA/Hibernate, SQL, concurrency, and backend development. Currently building production-style backend systems using PostgreSQL, Kafka, Redis, Docker, and automated testing, including a modular-monolith digital wallet and payment platform.

Technical Skills

Languages: Java 21/25, Python
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices Concepts, FastAPI
Databases: PostgreSQL, MySQL, MongoDB, H2
Messaging & Caching: Apache Kafka, Redis
DevOps & Tools: Docker, Kubernetes, AWS, CI/CD, GitHub Actions, Helm, Argo CD, MinIO, Prometheus, Grafana
Testing: JUnit 5, Postman

Professional Experience

Software Engineer May 2022 – Oct 2023
FEV India Pvt. Ltd., Pune

- Contributed to Java-based software development within the Software Defined Vehicle department.
- Developed a Bluetooth application using Java for device connectivity and application functionality.
- Developed a media player application using Java and SQLite, with Git-based development and debugging.
- Applied multithreading, concurrency, and code optimization techniques in application development.

Projects

PayFlow – Distributed Digital Wallet & Payment Platform GitHub

- Developed a modular-monolith financial platform covering account, wallet, payment, transaction, and ledger domains.
- Implemented transactional wallet and payment workflows with **validation, optimistic locking, idempotency, double-entry ledger accounting and PostgreSQL integration testing.**
- Built REST APIs and automated tests with domain-oriented application boundaries, transaction management and failure-handling workflows..

Git-Prasaaran | Git-Backed Markdown Documentation Publishing Engine GitHub

- Built a full-stack documentation platform using Java, Spring Boot, React, TypeScript, PostgreSQL, Redis, and GitHub APIs.
- Implemented JWT/RBAC security, webhooks, AI-powered Q&A, MCP, Docker, CI/CD, and cloud deployment.

Cloud-Native Thumbnail Pipeline – Cloud-Native Image Processing Platform GitHub

- Built a containerized image-processing service using **FastAPI, Docker, Kubernetes, MinIO, Pillow, and Knative,** implementing thumbnail generation, S3-compatible object storage, health checks, and persistent storage.
- Implemented **CI/CD and GitOps** with GitHub Actions and Argo CD, plus **observability and security** using Prometheus, Grafana, OpenTelemetry, Jaeger, Trivy, Kubernetes security controls, and NetworkPolicy.

Career Break & Technical Development

Nov 2023 – Present
Had to take a career break due to personal and family circumstances while continuing professional development through technical certifications, hands-on software projects, and **DevOps training in Linux, Docker, Kubernetes, Jenkins, Git, and CI/CD; currently building a portfolio of Java backend applications.**

Certification

Course in DevOps – Sunbeam CDAC, Pune Nov 2025

Education

PG Diploma in Mobile Computing – SUNBEAM CDAC, Pune Apr 2022
66.86%

BE in Computer Science – SGB Amravati University Nov 2020
